I think *Monsters Inc.* is a great computer animation film. I like it because it's really funny, it has a great story and the actors who do the voices are brilliant.

The story is set in a huge monster factory. The monsters have to care children because power for the factory comes from the children's screams. The problem is when a little girl comes into the factory and can't get out.

My favourite character is Sulley (James Goodman). He's huge with blue fur and large purple spots. I also like his little green one-eyed friend, Mike (Billy Crystal). Mike always has something to say!

In my view, *Monsters Inc.* is the best computer animation film I've seen. The technology is fantastic.

**Giving opinions**

**WRITING TIP!**

Make your writing more interesting by giving your opinion. Use different ways to do this:

I think *Shrek* is a fantastic film.

My favourite film character is James Bond.

In my opinion, the *Harry Potter* films aren't as good as the books.

I also like horror films.

In my view, Daniel Radcliffe is too young to be a star.
