

## SUMMER PROGRAMME June 28<sup>th</sup> – July 23<sup>rd</sup>

The ISA Summer Programme will run from June 28<sup>th</sup> to July 23<sup>rd</sup> and is designed for both English and Non-English speakers. The students are placed according to age level. The programme runs daily Monday through Friday and starts at 9:00am. Dismissal is at 15:00.

This Year's theme is ***"LEARN FROM THE PAST, CREATE THE FUTURE -INVENTIONS"***  
***People invent to solve problems and to improve the quality of life.***

An enthusiastic group of teachers have created an enriched programme to facilitate the students in building their knowledge of the English language as well as their confidence in speaking, writing, listening and reading. The topic we will focus on this year is "Inventions – People invent to solve problems and to improve the quality of life."

Students will see how inventions evolve over time and how society changes after certain inventions have been invented. They will investigate the causes or circumstances that led to the creation of important inventions.

The weekly schedule includes Language Arts, Computers, Drama, Gross Motor Activities, Arts and Crafts. The athletics department is responsible for organizing sports activities. The schedule also allows for a weekly beach trip.

Fridays will be special days. The students will go on a variety of field trips; OAKA, Adventure Park, and the Automobile Museum. At OAKA they will have the opportunity to participate in a variety of sports activities. On the second Friday of the program, the students will go to Adventure Park. This is a recreational area in the forest where activities associated with nature are organized.

On the last day of the program, Friday July 23<sup>rd</sup>, the teachers will organize a Fun Day with water games at school followed by a talent show.
